

How to Change Your Devolutions Web Login Client from Remote Desktop Manager to Devolutions Server

If you're like me and your head is in the clouds a lot (it's kind of an "absent-minded professor" thing), then you should be using one of my favorite tools: Devolutions Web Login.

DEVOLUTIONS WEB LOGIN IS A BROWSER EXTENSION THAT AUTOMATICALLY STORES AND RETRIEVES YOUR LOGIN CREDENTIALS FROM REMOTE DESKTOP MANAGER (RDM) OR DEVOLUTIONS SERVER (DVLS). You can save your credentials in an <u>RDM</u> <u>data source</u> or in your <u>Private Vault</u>.

Changing Your Client Application from RDM to DVLS

Changing your Devolutions Web Login client application from RDM to DVLS is fast and easy. Here's what to do:

- (1) Click the **Devolutions Web Login** icon.
- (2) In the dropdown menu, click **Options**.

3 In Devolutions Web Login – General Settings, uncheck Enable link to Remote Desktop Manager app and check Enable link to Devolutions Server.

4 In the **Devolutions Server** option, enter your Devolutions Server host, and then click **Test Server** to make sure you've entered the right information. If everything works properly, click **Save** (if you don't save, your changes won't take effect).

Enable link to Remote Desktop Manager app Enable link to Password Vault Manager app
Enable link to Devolutions Server
Enable native messaging
Use Legacy API
Color the fields filled
Select your favorite color:
Destination group on save: Devolutions Web Login Save
Destination group on save: Devolutions Web Login Save
Destination group on save: Devolutions Web Login Save
Destination group on save. Devolutions Web Login Save Link: Remote Desktop Manager port: Ø Use default port 19443 Save Resoverd Vault Manager port: Ø Use default port 19444 Save
Destination group on save: Devolutions Web Login Save Link Remote Desktop Manager port: Use default port 19443 Save Remote Desktop Manager application code Application code Save
Destination group on save: Devolutions Web Login Save Link Remote Desktop Manager port:

And there you go! From then on, your Devolutions Web Login client application will be DVLS, and that's where your credentials will automatically be stored and retrieved. It's as easy as baking a cake or falling off a log!
