March Poll : What should we add to our mobile versions of Remote Desktop Manager?

Devolutions

DEVELOPING NEW FEATURES AND FUNCTIONALITY THAT WILL ANSWER YOUR NEEDS AS AN IT PRO.

Hey everyone,

A few months ago, we launched the much-anticipated **mobile versions of Remote Desktop Manager** on iOS, Android and Amazon FireOS. So far, the feedback has been overwhelmingly positive, and we're glad that so many of you are finding them useful. However, as you hopefully know, we're always looking for ways to innovate and improve.
And that brings us to the March Poll question: **What would you like us to add to our mobile versions of RDM?**

This could be a completely new feature, a change or enhancement to an existing feature, or anything else that is on your wish list! We don't take things for granted and we know we still have a lot of work to do to bring our mobile versions up to par with our desktop versions. We want to make sure that we're headed in the right direction by developing new features and functionality that will answer your needs as an IT pro.

If you haven't already, you can download RDM on iOS, Android and FireOS here:

DOWNLOAD REMOTE DESKTOP MANAGER FOR Android | DOWNLOAD REMOTE DESKTOP MANAGER FOR FireOS | DOWNLOAD REMOTE DESKTOP MANAGER FOR iOS

YOU COULD WIN!

By participating in our poll, we'll learn what you want – and possibly integrate your ideas into future versions. What's more, you'll be eligible to **win a $25 Amazon gift card**! We'll select 4 lucky participants at random, and announce them when we share the results next month. Thank you in advance for participating, and good luck!
