

[NEW FEATURE] Chat Now Available for Devolutions Password Server (DPS) & Wayk Now

Devolutions

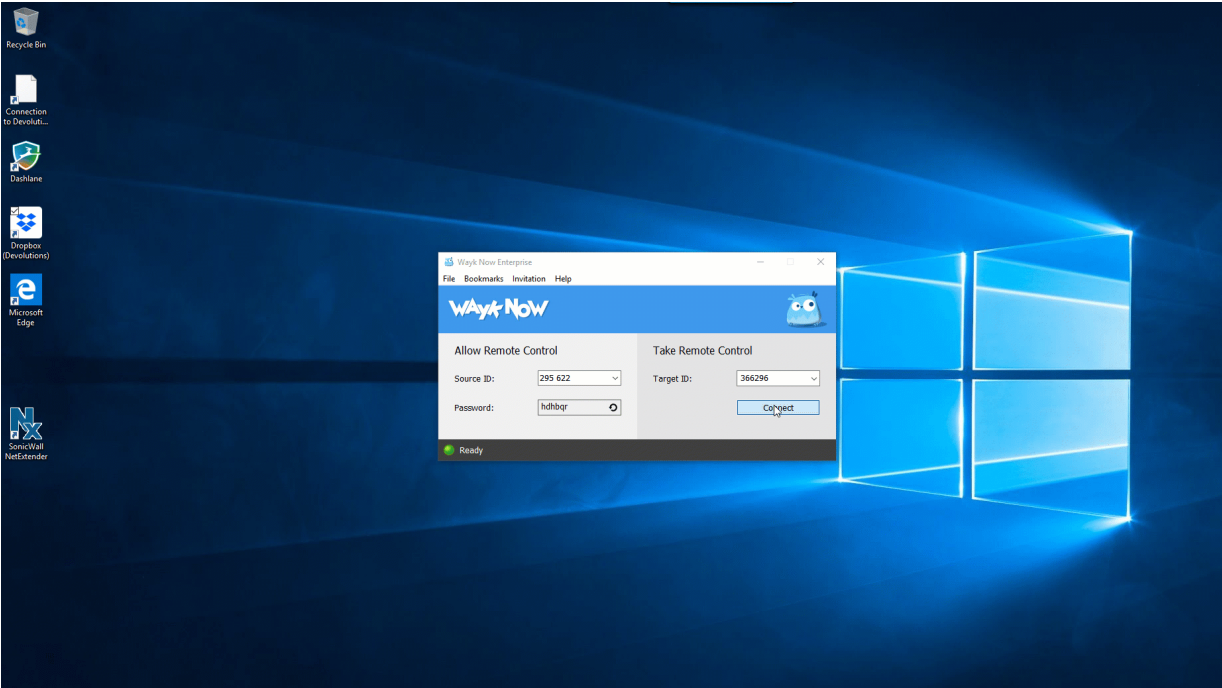

**WAYK NOW CHAT NOW
OFFERS SECURE, FLEXIBLE
INSTANT MESSAGING THAT
IS EASY TO USE!**

Happy New Year everybody! I hope you all had amazing holidays, and that Santa (or whoever your gift source is) decided you were nice instead of naughty.

My approach to getting back to work after taking some time off is like my approach to getting into a pool: it's best just to jump right in instead of one small bit at a time. So let's get going and take a look at one of my favorite new features in Devolutions Password Server (DPS) and Wayk Now: Chat!

Wayk Now Chat

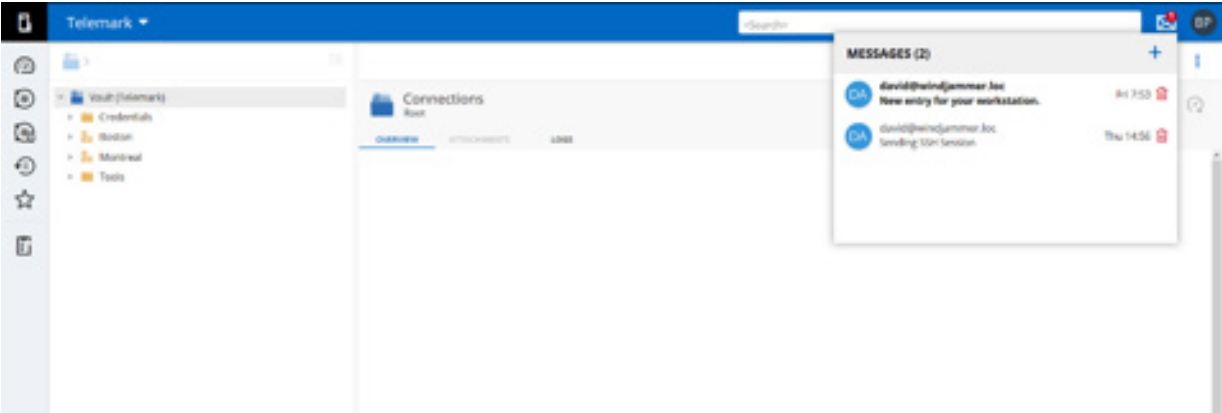

Wayk Now Chat now offers secure, flexible instant messaging that is easy to use, and all information is secured via end-to-end encryption. Whether you need to instantly message a client about their support case or update a colleague on an issue, Chat is available to you from your desktop or from your smartphone.

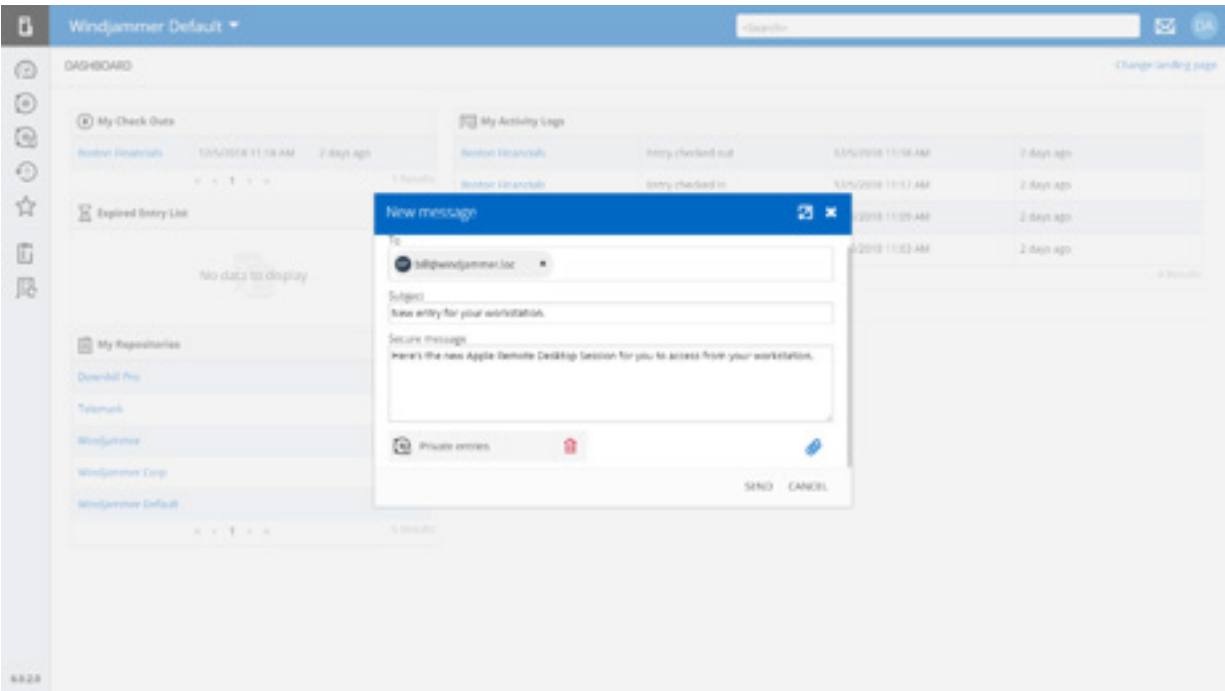

DPS Messaging

Secure messaging is a great addition to DPS, not only because it allows you to securely send messages to members of your team (like an in-house Facebook Messenger), but it also lets you send credentials and entries from your private vault. Finally, the days of sending privileged credentials and other sensitive information over e-mail, Slack or other insecure tools are over!

Here's a look at how easy it is to start a chat in DPS's safe and secure environment:

We'll Have More to Chat About

The year is just getting started, and I promise that we'll have A LOT to chat about in the months ahead. To all of you, I wish you great success in 2019 —and since we all know that communication is the key to success, I guess we're off to a pretty good start!

As always, please let us know your thoughts by using the comment feature of the blog. You can also visit our forums to get help and submit feature requests, you can find them [here](#).
