Petri IT Knowledgebase White Paper: Overcoming Remote Desktop Challenges with Remote Desktop Manager

Devolutions

**A LIVE WEBINAR
ON TUESDAY, APRIL 24TH, 2018
1PM EASTERN**

In today's technology-driven corporate environment, IT pros typically need to manage many different remote physical and virtual systems that reside locally, off-site, and in the cloud.

However, while managing remote desktops is an essential daily task, it also presents some difficult challenges, such as:

- Managing and organizing dozens, hundreds or thousands of remote connections.
- Protecting remote connections with robust enterprise-level security.
- Connecting to heterogeneous hosts across the entire IT infrastructure.

In collaboration with Petri IT Knowledgebase, we are pleased to provide you with this complimentary on-demand white paper that explores how to overcome each of these challenges. [Download it here.](#)

Moreover, there's a live webinar on Tuesday, April 24th, 2018 1PM Eastern presented by **Michael Otey, president of TECA, and moderated by Brad Sams, Executive Editor for Petri.com & Thurrott.com.** In this webinar you will learn what is and how to use Microsoft Remote Desktop Connection Manager (RDCMan), its strengths and weaknesses as well as its alternative: [Devolutions Remote Desktop Manager.](#)
