But the number of RDM users and our pride aren't the only things that are increasing, because RDM is also on the rise: say hello to version 13.5!

WHAT'S NEW

As many of you already know, RDM 13.5 actually launched a couple of weeks ago. But we've been so busy with the release of [Wayk Now 2.0](#), our new remote desktop and remote support tool that we're only now getting a chance to announce the good news.

Here are some of the new features and functions in RDM 13.5:

- New Integration for Devolutions Wayk Now
- Dropdown Menu for Quick and Easy Repository Switch
- Favorite and Recent Tabs Now Display Sessions from Multiple Repositories
- New Thumbnail Overview Dashboard for Current Opened Sessions
- Support for 1Password Web Mode
- Support for Box Cloud Explorer
- New CyberArk Vault Integration
- New RoboForm Credential Entry
- Many Performance Enhancements
- More than 125 improvements and fixes

Overall, there are a whopping 291 (yes that's right: 291) additions, enhancements and improvements in RDM 13.5. We don't play it small with releases! To see the complete change history, please click [here](#).

RDM + WAYK NOW

As you hopefully know, we've just made two [BIG changes to Wayk Now 2.0](#): it's now completely free for both personal and business use, and it's now integrated with RDM. As soon as you launch RDM, you'll be ready to support remote users without having to install the Wayk Now client on your machine or any other machines.
