

[WEBINAR] RDM Roadmap & Deep Dive: Learn How to Manage Roles and Permissions Like a Pro

RDM Roadmap & Deep Dive Roles and Permissions

WEBINAR

THROUGHOUT 2022 WE WILL BE DELIVERING A SERIES OF INTERACTIVE WEBINARS

Throughout 2022 we will be delivering a series of interactive webinars, during which our experts take a closer look at our various product features/functions. They will also explore key issues and priorities related to InfoSec, tech, governance, user management, and more. Each webinar will be focused, informative — and fun!

You are invited to our first webinar of the year: **“RDM Roadmap & Deep Dive: Learn How to Manage Roles and Permissions Like a Pro”**

Remote Desktop Manager’s powerful interface provides a single pane of glass to view all remote connections, along with a highly practical toolbox to maximize productivity, security, and efficiency. In addition, RDM enforces the Principle of Least Privilege (POLP) and secures access to critical assets through flexible role-based access control.

The interactive webinar will look at configuring roles and permissions in the most efficient way possible — maximizing flexibility, but without compromising security. You will learn:

- **How to create roles**
- **How to set roles and permissions on folders**
- **How to use inherited security**
- **How to use permissions in a granular way**

Our experts will also highlight the 2022 Remote Desktop Manager Roadmap, which covers the major improvements and developments that we have planned this year. There will also be a live Q&A session.

The webinar takes place on **Tuesday, February 22, 2022**, from **10:00 a.m. to 11:30 a.m. EST** (-4 GMT). [Click here to register now.](#)

We also invite you to explore our previous webinars, which are available on our [YouTube channel](#).

You can also [click here](#) to see all the online and in-person events that we have planned for 2022 (this list is constantly being updated).
